Seminar

Heegaard Floer homology of L-space links with two components

*Ms Beibei Liu
University of California, Davis*

Abstract

We compute different versions of link Floer homology for any L-space link with two components and prove that they are determined by the Alexander polynomials of every sublink of the L-space link. As an application, we compute the Thurston polytope and Thurston norm of the link complement and give some explicit examples.

Date: 12 December 2017 (Tuesday)
Time: 2:00pm – 3:00pm
Venue: Room 222, Lady Shaw Building,
The Chinese University of Hong Kong, Shatin

All are Welcome
